# Wave - Infotainment

Wave-Infotainment is the first both customer-specific and user-centric communication platform specially designed for use at POS as well as in industrial environments and service industries. The overall concept is driven by the idea to provide a full service package, where the core-element is an iPad- or similar tablet based App directly tailored to our customers demand, completely delivered with all affiliated hardware-components: iPad and Wave-Board with Wall-Mount (Wave-Businessdock).

- Fascinating & attractive Design-Item engineered and manufactured by Wave-Infotainment
- In-house development of modular Apps for iPad and other tablets, exactly tailored to customer needs
- Compelling usability with high user acceptance
- Wide range of applications with impressive success factor:  
e.g. scanning, unified communication, inventory management, logistics, payment systems, unified information source, Process- & Workflow-management
- Full integration and / or expansion of existing environments
- All-in-One: modular system for mobile and stationary use with Wave-Board and Businessdock
- Effective anti-theft lock technology with 360° screen-rotation
- integrated plug & play solution for power & data supply with innovative mag-lock technology
- Outstanding specs: theft-proof, resistant & high quality materials, suitable for use in industrial & commercial environments
- High-end-finish with diamond polished acrylic, anodized aluminum to complement the iPad and a precision swivel-lock with rotation and latching function, wide range of available colors
- Key benefits: synergy bundling, effective process-control, environmental-driven user-centric functionality, extensive customizability, thrilling opportunities
- For use at: POS-Terminals, Commerce, industrial Environments and production, Hotel & Hospitality, Service industries, Fairs & Exhibitions, Medical environments & Surgeries
- Made in Germany
